

Profile

QTech & reQall

QTech builds compelling and easy-to-use tools to help people remember. QTech's reQall lets people use any phone to capture and recall their everyday notes, tasks, and meetings via a simple voice interface and retrieve these anytime and anywhere via phone, email, and personal computer. A limited beta version of reQall is available in North America beginning February 8, 2007. A full product version will be available in mid-2007 as a monthly service with an estimated fee of \$9.95 per month.

Target customers

Individuals wanting to use simple tools help remember in their day-to-day lives.
Carriers wanting to bring compelling new services as value-added offering to consumers and enterprise to boost ARPU.

Secret Sauce

QTech's patent-pending technology help people remember, and gives unparalleled ease-of-use to record and retrieve voice notes from any phone.
