## India-based QTech Recognized as 2007 DEMOgod™

MOUNTAIN VIEW, Calif. and HYDERABAD, India - February 7, 2007 - QTech Inc. today announced the company was selected as a DEMOgod at the DEMO 07 conference in Palm Desert, Calif. Each year, the prestigious DEMOgod award is presented to select companies that show their ability to clearly articulate the significance of their debuting technology despite the pressures of a jaded audience, a make-or-break level of expectation, and a six-minute count down clock.

This year, only 10 of 68 DEMO 07 participants received the award. According to DEMO 07 organizers, DEMOgods are chosen by DEMO Executive Producer Chris Shipley with input from the production team, an inner circle of DEMO alumni and the reactions of the DEMO audience.

"QTech delivered a dynamic and engaging demo of its product reQall and articulated a solid value proposition," said Chris Shipley, executive producer, DEMO 07. "I congratulate the QTech team and look forward to their continued success."

"DEMO is a very prestigious event to launch and showcase innovative new products to an influential audience," said Dr. N. Rao Machiraju, QTech chairman and CEO. "We are delighted to have won this award. The experience was also greatly enriched by the insights and invaluable feedback we received from the DEMO attendees. We look forward to building on the momentum of DEMO and making reQall an excellent, useful and easy-to-use product."

QTech's flagship product reQall™, acts as your virtual personal assistant by enabling you to easily record and conveniently retrieve your reminders and notes based on your contextual preferences. reQall is patent-pending software technology that uses a combination of voice interface and speech-recognition technology to record, log and retrieve your tasks, meetings and voice notes. The service can be used via any phone and does not require any software downloads. Instead, a user accesses the reQall service by calling a toll-free number.

A limited beta version of reQall is available in North America beginning February 8, 2007. A full product version will be available in mid-2007 as a monthly service with an estimated fee of \$9.95 per month. Later versions of the service will provide keyword text search and the option of downloading enhanced features via a mobile phone widget.

### About QTech Inc.

Headquartered in Hyderabad, India, QTech, Inc. is a venture-funded technology company that develops applications to transform all communication devices into memory aids by seamlessly integrating conversations and verbal notes into work, search and telephone environments. QTech's technology is designed and provided through partnerships with the world's largest mobile carriers, VoIP service providers, and wireless telephone manufacturers. The company's management team includes N. Rao Machiraju, Sunil Vemuri, Jacky Mallett and Debra Miller. Don Norman is the company's chief mentor. The company's U.S. headquarters is located at NASA Research Park, Moffett Field, Calif.

## About the DEMO Conferences

Produced by Network World Events and Executive Forums, the semi-annual DEMO conferences focus on emerging technologies and new products, which are hand-selected from across the spectrum of the technology marketplace. The DEMO conferences have earned their reputation for consistently identifying tomorrow's cutting-edge technologies, and have served as launch pad events for companies such as Palm, E\*Trade, Handspring, and U.S. Robotics, helping them to secure venture funding, establish critical business relationships, and influence early adopters. Each DEMO conference features approximately 70 new companies, products and technologies. For more information on the DEMO conferences, visit <http://www.demo.com/>.
